1. Eli Ben-Sasson, Yohay Kaplan, Swastik Kopparty, Or Meir, and Henning Stichtenoth, “Constant rate PCPs for circuit-SAT with sublinear query”, to appear in FOCS 2013.
2. Or Meir, “IP = PSPACE using Error Correcting Codes”, SIAM Journal on Computing 42(1), pages 380-403, 2013.
3. Oded Goldreich and Or Meir, “The Tensor Product of Two Good Codes Is Not Necessarily Robustly Testable”, Information Processing Letters 112(8-9), pages 351-355, 2012.
4. Or Meir, “On the Rectangle Method in proofs of Robustness of Tensor Products”, Information Processing Letters 112(8-9), pages 257-260, 2012.
5. Or Meir, “Combinatorial PCPs with Short Proofs”, IEEE Conference on Computational Complexity 2012, pp. 345-355.
6. Oded Goldreich and Or Meir, “Input-Oblivious Proof Systems and a Uniform Complexity Perspective on P/poly”, ECCC TR11-023, 2011.
7. Irit Dinur and Or Meir, “Derandomized Parallel Repetition via Structured PCPs”, Computational Complexity 20(2), pages 207-327, 2011 (invited paper). A preliminary version appeared in IEEE Conference on Computational Complexity 2010, pp. 16-27.
8. Or Meir, “Efficient Combinatorial PCPs”, FOCS 2009, pp. 463-471, to appear in Computational Complexity.
9. Or Meir, “On the Efficiency of Non-Uniform PCPP Verifiers”, ECCC TR08-064.
10. Or Meir, “Combinatorial Construction of Locally Testable Codes”, SIAM Journal on Computing 39(2), pp. 491-544, 2009. A preliminary version appeared in STOC 2008, pp. 285-294.
