- [1] Liran Rotem. On the mean width of log-concave functions. In Bo'az Klartag, Shahar Mendelson, and Vitali Milman, editors, *Geometric Aspects of Functional Analysis, Israel Seminar 2006-2010*, volume 2050 of *Lecture Notes in Mathematics*, pages 355–372. Springer, Berlin, Heidelberg, 2012.
- [2] Liran Rotem. Characterization of self-polar convex functions. *Bulletin des Sciences Mathématiques*, 136(7):831–838, oct 2012.
- [3] Vitali Milman and Liran Rotem. Mixed integrals and related inequalities. *Journal of Functional Analysis*, 264(2):570–604, jan 2013.
- [4] Vitali Milman and Liran Rotem. α -concave functions and a functional extension of mixed volumes. *Electronic Research Announcements in Mathematical Sciences*, 20:1–11, jan 2013.
- [5] Liran Rotem. Mixed integrals and related inequalities (part of Integral Geometry and its Applications). *Oberwolfach Reports*, 10(1):322–324, 2013.
- [6] Liran Rotem. Support functions and mean width for α -concave functions. *Advances in Mathematics*, 243:168–186, aug 2013.
- [7] Emanuel Milman and Liran Rotem. Complemented Brunn-Minkowski inequalities and isoperimetry for homogeneous and non-homogeneous measures. *Advances in Mathematics*, 262(826):867–908, sep 2014.
- [8] Liran Rotem. A sharp Blaschke-Santaló inequality for α -concave functions. *Geometriae Dedicata*, 172(1):217–228, oct 2014.
- [9] Liran Rotem. On isotropicity with respect to a measure. In Bo'az Klartag and Emanuel Milman, editors, *Geometric Aspects of Functional Analysis, Israel Seminar 2011-2013*, volume 2116 of *Lecture Notes in Mathematics*. Springer, Berlin, Heidelberg, 2014.
- [10] Liran Rotem. A letter: The log-Brunn-Minkowski inequality for complex bodies. *arXiv:1412.5321*, dec 2014.

- [11] Vitali Milman and Liran Rotem. Characterizing addition of convex sets by polynomiality of volume and by the homothety operation. *Communications in Contemporary Mathematics*, 17(3):1450022, jun 2015.
- [12] Liran Rotem. Algebraically inspired results on convex functions and bodies. *Submitted*.
- [13] Vitali Milman and Liran Rotem. Characterizing the radial sum for star bodies. *Submitted*.
- [14] Vitali Milman and Liran Rotem. Non-standard constructions in convex geometry; geometric means of convex bodies. *In preparation*.
